

# I wonder...what is water?

Next half term we will be learning about water: where we can find it, what we can do with it and how it can change.

Over the half term break we would like you to find out some interesting things about water. Use your imagination, we know this is a very broad topic!

The types of things you might want to find out about water are: how it changes when you heat or cool it; dissolving; water sources such as rain, ponds, rivers and the sea; things that live in water; floating and sinking; what living things need water to survive.

We will be creating a great display of your findings so it would be great if you could email or upload your findings onto Google Classroom please. Have fun!

**On Friday 5th June we will take a trip to our local pond to 'dip'.  
Please could we have parent helpers to accompany us.**

**Please can your child bring:**

- **Wellies (with high sides, as we will go into the water)**
- **A change of clothes if they get wet**
